

Create a "GDI" email address with your domain: gdi@domainname.ws

When you will click on the email address you will get this

Select Domain to Work With:

WORKWITHGDI.WS

<u>Total Active Mailboxes:</u>	1
<u>Total Forwarded Prefixes:</u>	0
<u>Total Blocked Email Prefixes:</u>	0
<u>Catch-All Forwarding Enabled:</u>	No

Active Mailboxes

Mailbox	Setting	Email Forwarding	Delete
gdi@workwithgdi.ws	Webmail / POP/IMAP	Disabled	<input type="checkbox"/>

You may create up to 10 mailboxes

Create New Mailbox

New Mailbox Prefix:	<input type="text"/>	@workwithgdi.ws
Password:	<input type="text"/>	

Password Confirm:	<input type="text"/>
Confirmation Will Be Sent by Email To	
First Name:	<input type="text" value="Elizabeta"/>
Last Name:	<input type="text" value="Kuzevska"/>
Send Confirmation to Email Address:	<input type="text" value="workwitws@gmail.com"/>
Also Copy Me At:	<input type="text"/>
<input type="button" value="Create Mailbox"/>	

Create exactly what they show you. Mine is **gdi@workwithgdi.ws** because my username is workwithgdi. In the first box where it says New Mailbox Prefix, type in **gdi**, the rest is there for you, enter your email in the box below if you wish to be sent a confirmation of this, then click "**Create Mailbox**". Click on Webmail. Enter your data

Email Address:	<input type="text" value="adi@workwithadi.ws"/>
Password:	<input type="text"/>
	Forgot your password?
	<input type="button" value="Log In"/>

And you are in.
